

- ❑ **Company name: 'Anti-corrosion coatings centre', LLC**
- ❑ **Address: 223-4, Zemetsa st., Samara, Russia**
- ❑ **Staff: 35 employees**
- ❑ **Establishment date: 2006**
- ❑ **Business profile: Anti-corrosion metal protection**

We provide the following services:

- ✓ Electrolytic Zn coating
- ✓ Phosphate treatment
- ✓ Tin plating

Anti-corrosion coatings are applied in line with Russian standard GOST 9.301.

Short term of work performance

Door-to-door shipping

We can perform rush orders

- **Coating samples**

«Our goal is to meet customers' requirements by constant improvement of our coatings».

Our main aims:

- ✓ Permanent production process improvement
- ✓ Delivery of high quality metal parts treatment meeting customers' requirement;

How we achieve the goals:

- ISO 9001: 2008 implementing.
- Delivery of parts in due time and with stable coating quality;
- Timely detection of defects in technological process and their prevention;
- New coatings analyses and implementing;

How we control quality of coating:

Quality control is made in line with Russian standard **GOST 9.301-86** and **GOST 9.302-88**. All important parameters are analyzed:

- ✓ **Outside product appearance**
- ✓ **Adhesion to metal**
- ✓ **Coating thickness**

To measure the coating thickness certified layer thickness meters 'Constants K-6' are used.

- ✓ **Corrosive resistance** is checked in salt spray camera according to Russian standard **GOST 9.308**.

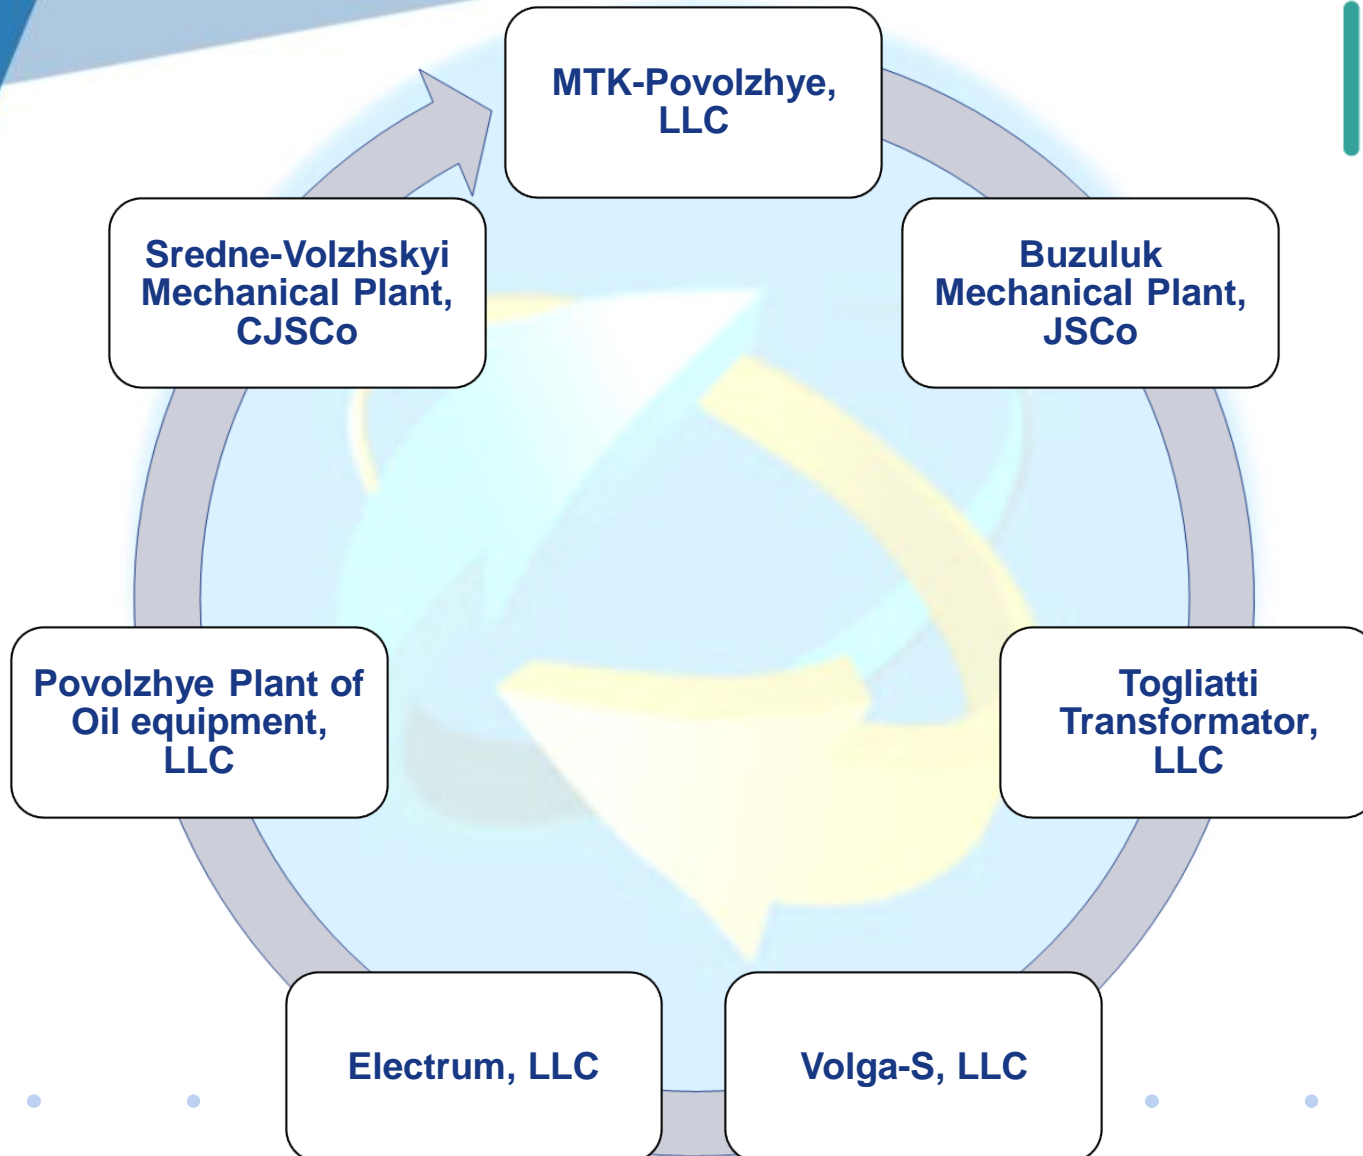

We are implementing **ISO 9001: 2008**. Implementing process consists of the following steps:

- Stable coating quality**
- Flexible pricing**
- Door-to-door shipping**
- Permanent improvement**
- Customer-oriented approach**
